

WEEK 9 MONDAY 10/16

Wright B. Seneres

Jefferson - East Falls

*Kanbar College of Design,
Engineering, and Commerce*

School of Design and Engineering

Introduction:

For tonight's class, I will give short demos on CSS transitions, transforms, and animation.

Demo: CSS Transitions

As part of your required code for your Project #1 - local business or product website, you will need to create two CSS transitions: one using the CSS transition shorthand, and one using the long version of the transition.

Here is an example of the CSS shorthand for a transition that affects the background color of a div with a class="demo":

```
.demo {  
    background-color: blue;  
    transition: background-color 2s ease-in 5s;  
}  
.demo:hover {  
    background-color: red;  
}
```

And here is the same CSS transition written longhand:

```
.demo {  
    background-color: blue;  
    transition-property: background-color;  
    transition-duration: 2s;  
    transition-timing-function: ease-in;  
    transition-delay: 5s;  
}  
.demo:hover {  
    background-color: red;  
}
```

In class we will review some basic CSS transitions, transforms, and animations.
